**What would you take to space?**

We would like you to design a 'Space themed treasure box' and talk about what things you would take with you if you were an astronaut visiting space. You can use any materials to create your treasure box

such as a cardboard box, shoe box, yoghurt pot or egg box and use different collage materials to decorate it like glitter, sequins, gems, buttons, stickers, lolly sticks, paint etc... To extend this activity introduce the children to the names of the different planets.

Here are some questions to ask your child:

- What do you know about space?
- How would you travel to space?
- What would you need to wear to space?
- How long do you think it would take to get to space?
- Do you think there are other people/animals living on different planets?

Dear Parents,

Once you have designed your space treasure box, please complete the following questions with your child and send them both to school to share with their class mates.

1. What 5 things would you take to space and why?

\_\_\_\_\_

I would take these things because \_\_\_\_\_

2. How would you feel if you were an astronaut going to Space?

\_\_\_\_\_

3. What things would you miss from Earth?

\_\_\_\_\_

4. Did you enjoy this activity? *(Please circle)*

Yes No Why? \_\_\_\_\_
