

Reception Parents,

Each week on this page, I will post a home learning task that we would normally have sent home in their homework books. Obviously, these do not need to be returned to school as it might state on the sheet. In addition, there will be some Maths and English tasks uploaded. On this page there are also links to websites.

In Reception, a couple of weeks ago, we saw a rainbow in the sky when on the playground. We talked about where rainbows come from and what they remind us of. In our class bible, we found a story about a rainbow that was sent as a promise.

This week make a rainbow together at home to remind you not to be afraid of things that can appear scary and to make you smile. Place your rainbow in your window of your home and spread some happiness.

It may feel strange this week not coming into school as normal. I hope you are all staying in, keeping safe and looking after each other.

With very best wishes and grateful thanks for all of your support at this difficult and uncertain time.

Mrs Chantler

Here are some rainbow craft ideas....
